PRODUCT DATA SHEET

FOAM BACKER ROD

For filling gaps prior to sealing

Description

Denver Foam Backer Rod is a non-gassing backer rod used as a backing for elastomeric & other applied caulking sealants. It controls the depth of applied sealants & ensures cross sectional hourglass configuration.

Application

For use in expansion/construction joints in concrete and pre-cast concrete walls, floors, partitions, bridge construction, parking decks, curtain walls, glazing, log home construction, highway construction & pavement maintenance.

Features

- Easy to use
- Economical
- Allows air to reach both sides of sealant offering a faster & more uniform cure
- Will resist oil, gasoline & most solvents, odorless & will not stain
