FN Button Guide

For Ghost External Plus, Ghost Internal, and Ghost Elbow: Condensate Mini Pumps
100–240V AC 50/60Hz

I. Test Mode: Use this to quickly check that the pump is functioning.

When the pump is powered on and in normal working mode:

1. **Press FN** → pump runs → **Solid Green LED**
2. **Release FN** → pump stops → **Flashing Green LED**

II. Setting Mode (to set Stop and Alarm water levels)

1. **Turn off power** to the pump.
2. **Press and hold the FN button, then power the pump on** to enter **Setting Mode**.
 - Both the red and green LEDs will flash.
 - If no action is taken for 20 seconds, the pump will automatically exit Setting Mode.
3. **Press the FN button once**.
 - The **green LED will flash**.
4. **Add water** until the water reaches the desired **Stop Level**.
5. **Press FN**.
 - The **green LED turns solid**, and the controller saves the Stop Level.
6. **Press FN again**.
 - The **red LED begins flashing**.
7. **Add water** until the water reaches the desired **Alarm Level** (red LED continues flashing).
8. **Press FN**.
 - The **red LED turns solid**, and the controller saves the Alarm Level.
9. **Press FN again**.
 - **Both green and red LEDs turn on solid**.
10. **Press and hold FN for 5 seconds** to confirm and save all settings.

III. Factory Reset

1. **Turn off power to the pump**.
2. **Press and hold FN, then power on** to enter Setting Mode.
(Will exit automatically after 20 seconds if no action is taken.)
3. **Press and hold FN for 5 seconds** to perform a full **factory reset**.
