FIRESTOP DEVICE

Flexible Firestop Protection

Pass-Thru Pro is a one-piece hinged metal firestop device for fast installation in fire-rated floors and walls. The square or round steel sleeve contains heat-reactive graphite intumescent material with foam smoke seals and optional mounting brackets.

The hinged design opens easily for retrofit applications or new construction requiring permanent firestop protection. Accommodates multiple penetrations and allows re-entry for future additions.

Benefits include:

- Quick installation reduces labor costs
- Retrofit capability around existing penetrations in single or multiple configurations
- Code compliant - Meets or exceeds EN1366-3, BS476-20, ASTM E814 (UL1479), and AS1530-4

ORDERING INFORMATION

Code	Description	Tint	Size	Size	Shape	Per Case
PASS-THRU PRO DEVICES						
PATP-2R	Device (50mm / 2")	Red	50mm ϕ	2"	Round	6
